

## Death Valley National Park Entrance Point Signs

**National Monument**  
1933

**National Park**  
1994

**Park Size**  
3.4 million acres,  
91% wilderness

**Annual Visitors**  
1.7 million

**Park Fee**  
\$30

**Superintendent**  
Mike Reynolds

**Partner Group**  
Death Valley Natural  
History Association

**Location**  
Inyo and San  
Bernardino Counties,  
CA, Nye County, NV

**Death Valley National Park** is a wildly rugged place of extremes, boasting some of the world's lowest, driest, and hottest places. It is the largest park in the lower-48 states, with 3.4 million acres and over 1,000 miles of roads, most of which are made of graded dirt, sand, and gravel.

Along its border, Death Valley has over 60 points of entry and many of these remote dirt-road entry points lack any sign marking the arrival for visitors or their signs are greatly in need of repair. Entrance point signs are a vital visitor service; they give welcome, provide a sense of arrival, and convey essential National Park Service information.

**The Fund for People in Parks** is providing a grant for design, construction, and installation of signs at a number of the highest-priority locations. This project includes creating a design template that will be highly replicable throughout the park for ease of future installation.

**Project Cost: \$19,825**

**Project Begun: 2019**
